*For dogs less than 10kg it is recommended to use Satiety Small Dog
**If the dog did not lose weight

Individual target weight is determined and then feeding amount established. The recommended daily intake is based on the pet's ideal weight. The starting ration may need to be adjusted during follow-up visits, based on each individual's response and the rate of weight loss. An objective of losing 1-3% bodyweight per week is generally achievable over the first 3 months, and of 0.5-2% afterwards.

How is the energy allocation for maintenance after weight loss calculated? Energy requirements to maintain stable body weight after weight loss are lower than those of dogs that have never been obese. Based on current scientific insights (German & al. 2011), our maintenance after weight loss rations are calculated by increasing the weight loss ration by +10%.

NOTE: maintenance rations may need to be adjusted based on individual evolution. German AJ & al. Low-maintenance energy requirements of obese dogs after weight loss. British Journal of Nutrition (2011), 106, S93-S96

WEIGHT MANAGEMENT

RECOMMENDED FOR WEIGHT LOSS AND MAINTENANCE AFTER WEIGHT LOSS IN CASE OF

- Overweight/Obesity
- Stabilized Diabetes Mellitus with overweight/obesity
- Hyperlipidemia with overweight/obesity

NOT RECOMMENDED IN CASE OF

- Dogs with a history of constipation in response to a high fibre diet
- Growth, gestation/lactation

EFFECTIVE WEIGHT MANAGEMENT

Provides safe weight loss and helps avoid weight regain. 97% of dogs lost weight in 3 months.

BEGGING CONTROL

High natural fiber level keeps dogs satisfied between meals. Helps control begging in 83% of dogs during weight loss.

MUSCLE MASS MAINTENANCE

High protein content helps support healthy weight loss while maintaining muscle mass.
